BLANCOCare™ 2 years parts & labour

Features

9 stage scrolling temperature settings

Boost Functions

Large 21 cm zone with 3000W power

Overflow cut off

Pot Detection

Locking function

99 minute Timer on all zones

Benefits

With 9 different settings, you can select the ideal cooking temperature for all types of foods to provide the perfect cooking results.

Convenient feature on 2 of the zones whereby the cooking zone selected 'boosts' to the maximum power level and will stay on maximum power for 5 minutes (unless deactivated).

A zone that is big enough to accommodate most pots and pans and powerful enough to cook even the most heat demanding dish i.e. stir-fry.

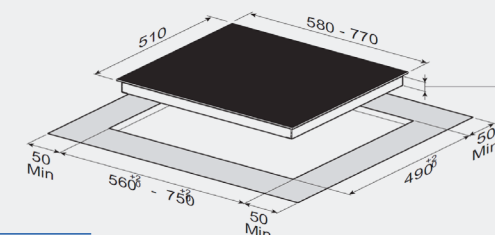

Safety feature of the cooktop, the unit will shut down automatically if:
- Pan is boiling over and spills into the touch controls
- A damp towel is placed over the touch controls

Once a pot is placed on any zone it will automatically detect it and heat up the zone accordingly. Once the pot is removed the zone will cool down immediately.

A safety feature to help prevent children from accessing cooktop controls. User can either 'lock' the cooktop either whilst in operation or when it is off.

Each zone has its own 99 minute timer function - a convenient and easy way to program the cooking time on any cooking zone. When the timer ends a beep will sound to advise the cooking is finished.

Specifications

Method of installation:	Benchtop
Dimensions:	580W x 510D mm
Cut-out Size:	560W x 490D mm Please allow an extra mil on all sides to cater for screws that project out on all 4 sides.
