BLANCOCare™ 2 years parts & labour.

Features

Benefits

Steam Cooking

There are many benefits of cooking with steam: the food conserves not just its natural smell, taste, form and colour, but also most of the microelements and vitamins that they contain when raw.

Fully Programmable Touch control LCD Panel

Perfect for those who live a busy lifestyle - you can pre-program the oven to start cooking the food whilst unattended, and the oven will automatically switch off when finished.

Removable Water Reservoir

Easy access to water tank with no plumbing required. No need to de-scale – reservoir is dishwasher safe.

Steam Evacuation

Evacuates steam during the last 3 minutes of cooking which minimises amount of released steam when the door is opened and protects surrounding cabinetry.

Control Panel Lock

Control panel locks to prevent children from accessing the steam oven functions.

Defrost Function

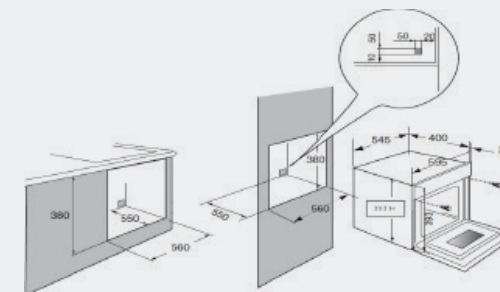

Does not dehydrate food during the defrosting process. Maintains food integrity

Auto Pause and Alert

Cooking pause acoustic alarm to signal when water reservoir is low which allows user to add more tap water.
