

9th December 2025

Vessel Details: 1997 Johnson 58 Motor Yacht – Zanzibar

Infinite Marine Brokers has been asked to provide a market appraisal of this vessel. This vessel has had extensive works completed – refit to the value of \$250,000, over \$100,000 on motors including 4 turbos, bearings.

We have been provided with relevant information to assist in preparing this figure. Along with this information we have compared recent sales of vessels in similar size and specification within Australia and completed a comprehensive market review. Based on our assessment, we believe a vessel of this make, model and condition in the current market would be expected to command a figure of: \$590,000.00 AUD.

As a boat and yacht broker, it is part of our daily role to appraise and market vessels for sale. In doing this we do not run motors, do not check structural integrity and do not check operational systems, as these components vary from vessel to vessel and require specialist evaluation.

Our valuation relies on information provided to us by the vessel owner or their representative. We strongly recommend that purchasers commission professional inspection for hull structure, mechanical, electrical, and rigging systems before purchase. This approach aligns with the policy of both the Boating Industry Association (BIA) and Infinite Marine Brokers, which is a member of the BIA.

Regards
